## TECHNICAL PROJECTS

### **COVID-19 Informational App**, *Full Stack Application*

<https://github.com/Jaesenix/CovidCorner>

<https://covidcorner.herokuapp.com/>

- Collaborated with a team of four to create a React application with a Node.js/Express backend and a MySQL database
- Built entire front end, building 90% of components, handled routing and responsible for the design, style and layout.

### **Employee Directory**, *Full Stack Application*

<https://github.com/jwhityoung/Employee-Directory>

<https://frozen-thicket-63792.herokuapp.com/>

- Built create-react-app from scratch to allow any company employee to sort by employee name, role or department as well as search by role.
- Imported React Table and used React hooks useSortBy and useFilters to enable functionality

### **CoolPlaces**, *Full Stack Application*

<https://github.com/nmichel123/Project2>

<https://floating-beach-29144.herokuapp.com/>

- Collaborated with a team of four to build application designed to connect users through cool places that they had visited by allowing users to add, review and view other user's entries using JavaScript, Node.js, MySQL/Sequelize, Mapbox API, HTML/CSS
- Responsible for design, style, layout and frontend JavaScript
